CERTIFICATE OF INDEPENDENT BID DETERMINATION

1. This Standard Bidding Document (SBD) must form part of all bids\(^1\) invited.

2. Section 4 (1) (b) (iii) of the Competition Act No. 89 of 1998, as amended, prohibits an agreement between, or concerted practice by, firms, or a decision by an association of firms, if it is between parties in a horizontal relationship and if it involves collusive bidding (or bid rigging).\(^2\) Collusive bidding is a per se prohibition meaning that it cannot be justified under any grounds.

3. Treasury Regulation 16A9 prescribes that accounting officers and accounting authorities must take all reasonable steps to prevent abuse of the supply chain management system and authorizes accounting officers and accounting authorities to:
   a. disregard the bid of any bidder if that bidder, or any of its directors have abused the institution's supply chain management system and or committed fraud or any other improper conduct in relation to such system.
   b. cancel a contract awarded to a supplier of goods and services if the supplier committed any corrupt or fraudulent act during the bidding process or the execution of that contract.

4. This SBD serves as a certificate of declaration that would be used by institutions to ensure that, when bids are considered, reasonable steps are taken to prevent any form of bid-rigging.

5. In order to give effect to the above, the attached Certificate of Bid Determination (SBD 9) must be completed and submitted with the bid:

---

\(^1\) Includes price quotations, advertised competitive bids, limited bids and proposals.

\(^2\) Bid rigging (or collusive bidding) occurs when businesses, that would otherwise be expected to compete, secretly conspire to raise prices or lower the quality of goods and / or services for purchasers who wish to acquire goods and / or services through a bidding process. Bid rigging is, therefore, an agreement between competitors not to compete.

8. In addition, there have been no consultations, communications, agreements or arrangements with any competitor regarding the quality, quantity, specifications and conditions or delivery particulars of the products or services to which this bid invitation relates.

9. The terms of the accompanying bid have not been, and will not be, disclosed by the bidder, directly or indirectly, to any competitor, prior to the date and time of the official bid opening or of the awarding of the contract.

1. **INTRODUCTION**

1.1 The Department of Transport (NDoT) supports quality public transport networks as articulated in the National Transport Policy, the National Land Transport Act and the Public Transport Strategy (PTS) and Action Plan (2007).

1.2 The National Development Plan (NDP) in Chapter 4 states that “to achieve sustainable and inclusive growth by 2030, South Africa needs to invest in a... network of economic infrastructure designed to support the country’s medium and long-term objectives. Achieving this vision is possible, if there is targeted development of transport, energy, water resources and information and communication technology (ICT) networks”.

1.3 The Public Transport Network Grant is one mechanism by which municipalities are able to strategically invest in the appropriate planning and delivery of quality road based public transport systems. The Grant enables municipalities to begin to develop infrastructure and services which reflect priority for public transport and non-motorised travel, even at the expense of free-flowing private traffic. The Grant also enables the progressive development of universally accessible transport systems in participating municipalities.

1.4 Participating municipalities are required to develop and maintain a full network plan at least in outline, which shows the geographic extent of the proposed public transport network and the types of the facilities or investments envisaged (e.g. rail lines, busways, tramways, feeder and distributor services, stations, and depots). This should be broken down into implementation phases, each of which should be costed.

2. **REQUEST FOR PROPOSALS**

2.1 Currently, cities are at different stages of IPTN development and implementation. By July 2019 at least 9 of the 13 PTN Grant funded cities will be operating. There is an urgent need to oversee as well as to monitor cities in order to manage operations efficiently through minimising costs and maximising patronage.

Depending on the stage of implementation of the IPTN, the service provider will be required to provide technical monitoring to the cities, in their processes of implementing IPTNs.

2.2 The monitoring will be in the form of expertise deployed to oversee and assist the Department in assessing IPTN project design, IPTN infrastructure designs, and viability of IPTN operations, including:

2.2.1 Assistance to the NDoT in evaluating value for money of spending (on infrastructure and operations) as well as the probity thereof;
2.2.2 Convene support sessions and workshops with the Department at cities and other experts on various aspects of IPTN plan, design, construction (building), operation and maintenance;

2.2.3 Develop and monitor cost and revenue benchmarks on IPTN implementation, especially on operations, ITS, minibus participation and infrastructure;

2.2.4 Conduct financial and operational performance assessments of city projects and develop recommendations to improve patronage and/or financial viability;

2.2.5 Conduct site visits, review infrastructure designs and costs, and propose alternatives that can speed up implementation while increasing patronage and reducing unit costs.

3. PROGRAMME JUSTIFICATION

3.1 IPTN projects entail providing quality public transport services that are integrated, affordable, accessible, frequent, safe and comfortable in all 13 municipalities.

3.2 IPTN projects offer direct empowerment to the affected taxi industry and bus operators through shares in the Vehicle Operating Company (VOC) or Bus Operating Company (BOC).

3.3 IPTN projects offer benefits such as reduced traffic congestion, while significantly contributing reducing emissions.

3.4 IPTN projects provides an opportunity for mitigating and ultimately reversing the inefficient spatial form of SA cities by providing a network backbone that can anchor mixed income, mixed use developments within walking distance of public transport services.

12.3.9 However, when functionality is part of the evaluation process and two or more bidders have scored equal points including equal preference points for B-BBEE, the contract will be awarded to the bidder scoring the highest for functionality.

12.3.10 Should two or more bids be equal in all respects, the award shall be decided by the drawing of lots.

12.3.11 A contract may, on reasonable and justifiable grounds, be awarded to a bid that did not score the highest number of points.
